SKILLS

- JavaScript, React.js, Next.js
- Node.js, Express.js, GraphQL
- Blockchain, Smart Contracts, Web3.js
- API Design & Development
- MongoDB, PostgreSQL, MySQL
- Unit Testing: Mocha, Chai, Sinon, Jest
- Git, Docker, CI/CD Pipelines
- Kafka, RabbitMQ, WebSockets

LANGUAGES

- English (Fluent)
- Urdu (Fluent)
- Sindhi (Fluent)
- Balochi (Fluent)

REFERENCE

Available upon request.

PROFILE

"Experienced MERN Stack Developer with over 2 years of expertise in full-stack web development, blockchain integrations, and API design. Proficient in building scalable web applications, decentralized apps (dApps), and automation solutions. Strong background in unit testing (Mocha, Chai, Sinon, TestDouble) and API documentation (Swagger). Passionate about delivering secure, efficient, and optimized solutions with modern JavaScript frameworks and backend architectures."

WORK EXPERIENCE

Tech Three, Islamabad
Software Engineer
June 2023 - March 2025

- Developed and maintained scalable blockchain-based applications using MERN stack and Web3 technologies.
- Designed and optimized RESTful APIs to improve performance and data handling.
- Ensure uniformity of the brand across all marketing platforms and materials.
- Integrated Kafka for real-time message processing and improved spam detection in Telegram bots.
- Created and optimized unit tests using Mocha, Chai, Sinon, and TestDouble, ensuring high test coverage.
- Led Swagger API documentation and migration of request payloads from JSON to form-data for enhanced file handling.

QF Network, Karachi
MERN Stack Developer
Nov 2022 - May 2023

- Built custom Shopify applications and blockchain-based solutions using React.js, Node.js, and Next.js.
- Developed secure authentication systems using JWT and OAuth, improving API security.

EDUCATION

BS Computer Science 2018 - 2022
Sukkur IBA University

- ACM Member | Contributed to hackathons and tech events
